* Measured according to standards EN 60745-1 and EN 60745-2-12 2010.

** Meter per second squared is a unit derived from the International System of Units for the acceleration of a body. Results according to ISO5349 norm: measurement and evaluation of human exposure to hand-transmitted vibrations. Holding the hose from 1m to the bottle approx. in the air. These values are approximate and may vary when the poker is with load depending on the concrete density.
